International Journal of Medical Students

The International Journal of Medical Students (IJMS) is a peer-reviewed open-access journal (ISSN 2076-6327) created to share the scientific production and experiences of medical students and recently graduated physicians worldwide.
The *International Journal of Medical Students* (IJMS) is an open-access, peer-reviewed scientific journal (ISSN 2076-6327) that publishes original research in all fields of medicine. The Journal was created in 2009 to share the scientific production and experiences of medical students (*i.e.*, MBBS students, MD students, DO students, MD/MSc students, MD/PhD students, etc.) and recently graduated physicians from all over the world. Our objective is to be the primary diffusion platform for early-career scientists, using standards that follow the process of scientific publication.

The *IJMS* receives submissions where there is at least one author enrolled as a medical student in any medical school in the world or a recently graduated physician worldwide. For research articles, early-career scientists must be accompanied by a senior researcher that must be also responsible for the research, guaranteeing the quality of the work. We publish Original Articles, Short Communications, Reviews, Case Reports, Interviews, Experiences, and Letters, which follow an innovative and unique two-step, double-masked peer-review process, in brief:

The first step of revisions is carried out by two Student Editors (medical students with publications indexed in the US National Library of Medicine (NLM) with the supervision of an Associate Editor. The aim of this step is to improve the quality of articles and identify those that can proceed to external peer-reviews. The second step of revisions is carried out by external peer-reviewers who are researchers with publications indexed in the NLM related to the topic of the submission.

The time between submission and final publication in most cases has been two to four months depending on the diligence of Peer-Reviewers and Authors.

The *International Journal of Medical Students* is published online quarterly (March, June, October, December) by the *University of Pittsburgh Library System*, a member of the *Open Access Scholarly Publishers Association*, as part of its Pitt Open Library Publishing imprint.

The journal main office is located in the United States of America (USA). Any publication, dissemination or distribution of the information included in the Journal is permitted if the source is cited (*Int J Med Stud*).

The IJMS acceptance rate is 18% of the almost 350 annual submissions. Published articles in 2021 came from 32 different countries. The average days to a first decision is 14 days, 143 for acceptance, and 31 to decline a submission. The time between submission and final publication in most cases has been three to four months depending on the diligence of Peer-Reviewers and Authors.

The journal's website got over 75 thousand visits only in 2021. The IJMS's reach includes a growing social media presence (more than 15,000 followers on Twitter, Facebook, Instagram, and LinkedIn). Only in the last 2 years, the Journal has been visited from nearly every place in the world (+190 countries). You can find more of the IJMS statistics here.

The Journal and the Editorial Board are not responsible for the opinions expressed by the Authors of all materials published, nor do these represent the Official Policy or medical opinion of the Journal or the institutions with which they are affiliated unless otherwise stated.

Open Access Policy

This journal provides immediate open access to its content. Our publisher, the University Library System at the University of Pittsburgh, abides by the Budapest Open Access Initiative definition of Open Access to open access to peer-reviewed research literature as "(...) free availability on the public internet, permitting any users to read, download, copy, distribute, print, search, or link to the full texts of these articles, crawl them for indexing, pass them as data to software, or use them for any other lawful purpose, without financial, legal, or technical barriers other than those inseparable from gaining access to the internet itself. The only constraint on reproduction and distribution, and the only role for copyright in this domain, should be to give authors control over the integrity of their work and the right to be properly acknowledged and cited."

Furthermore, we encourage authors to post their pre-publication manuscript in institutional repositories or on their websites prior to and during the submission process, and to post the Publisher's final formatted PDF version after publication. These practices benefit authors with productive exchanges as well as earlier and greater citation of published work.

There are no article processing charges, submissions fees, or any other costs required of authors to submit, review or publish articles in the IJMS.

Peer Review Process

All papers submitted to the International Journal of Medical Students will undergo a two steps peer-reviewers process. The first step of revisions is carried by two anonymous Student Editors who will work together with one Associate Editor. In the second step, the manuscript will be reviewed by two anonymous reviewers (Editorial Board members, Associate Editors and/or invited reviewers with expertise in the subject matter). Authors will remain anonymous to all the referees.

The IJMS review process guarantees and supports the quality and validity of the work published at the IJMS. Reviewers are given three weeks to complete their tasks.

Reviewers and editors are obliged to retain the contents as privileged and confidential until publication. The Editor in Chief and the Editorial Board will have final authority over an article's suitability for publication.

The IJMS also strive towards the training of a new generation of Editors and Peer-reviewers promoting different training strategies among our Editorial Team that includes the Web of Science Academy courses and the Committee on Publication Ethics (COPE) courses available to its members (IJMS is a member of COPE).
Archiving

This journal utilizes the LOCKSS system to create a distributed archiving system among participating libraries and permits those libraries to create permanent archives of the journal for purposes of preservation and restoration.

## Table of Contents

### Editorial

**Medical Student Research Journals: The International Journal of Medical Students (IJMS)**

Legacy

**War on Ukraine: Impact on Ukrainian Medical Students**

### Original Article

**Reliability and Discriminant Validity of a Checklist for Surgical Scrubbing, Gowning and Gloving**

Stephen P. Canton, Christine E. Foley, Isabel Fulcher, Laura K. Newcomb, Noah Rindos, Nicole M. Donnellan.

**Reliability Generalization of the Medical Student Stressor Questionnaire**

Mason A. Montano, Samuel A. Montano, Jennifer L. Harrison, Trisha M. Kivisalu.

**Teachers’ View on Online Classes during the COVID-19 Lockdown – A Cross-Sectional Study**

Andrew Thomas, Mohan T. Shenoy, Kotacherry T. Shenoy, Sruthi Suresh Kumar, Aboobakker Sidheeque, C. Khovidh, Jayakumar Parameshwaran Pillai, Pramod Murukan Pillai, Shana Sherin CH, Anna Mathew, TWinkle Zakkar, Sreelakshmi Dileep, Victory Mekha, Sony Raju, Mohammed Junaid K, Sivendu P.

**Predictors of Early (0-7 Days) and Late (8-30 Days) Readmission in a Cohort of Acute Coronary Syndrome Patients**

**Clinical Elective Choices and Motivations for Future Career Specialty Selection of Medical School Trainees and Junior Doctors of the University of the West Indies, Jamaica**

Jean Williams Johnson, Leohrandra Graham, Eric Williams, Colleen Campbell, Nidhi Thomas, Maxine Gossell-Williams.

**Medical Student Teleconferencing Experiences and Financial Status: A Cross-Sectional Survey**

Ivy A. Huang, Yasmeen Dhindsa, Alina J. Chen, James Wu, Justin P. Wagner, Areti Tillou Formosa Chen.

**Assessing Medical Students’ Self-Perceived Preparedness to Care for Gender Diverse Patients: A Survey Study**

Kyra L. Bonasia, Allie Morgan, Christina Grace Solomon, Ella A. Damiano.
Short Communication
Rationalizing the Pediatric Emergency Department Workload: An Epidemiological Profile of Presentations Before and During the COVID-19 Pandemic
Hannah Farley, Helen Bennett, Sahana Rao.

Review
Childhood Effects of Prenatal and Postnatal Exposure to Mercurial Skin Lightening Agents. Literature Review
Rebecca Murerwa, Fidel Gwala, Thomas Amuti, Mary Muange.

Case Report
Dyke-Davidoff-Masson Syndrome: A Case Report
Gaurav M. Urs, Hitesh R. Doddabale.

Experience
Eye-Opening Medical Missions
Ethan Waisberg.

Medical Interns as Volunteers in the COVID-19 Vaccination Drives in the Philippines
Ian Christopher N. Rocha, Kimberly G. Ramos, Alyssa A. Solaiman-Balt, Trisha Denise D. Cedeño.

Experience in a Palliative Care Unit in a Mexican Tertiary Level Hospital.
Patricio García-Espinosa.

A Medical Student’s Perspective on the Growing Importance of Telemedicine / Telerehabilitation
Sung-Hoon Park, Nuray Yozbatiran.

The Student Dermatology Clinic for the Underserved: A Service-Learning Model to Promote Skin Health Equity
Bansri M. Patel, Victoria Humphrey, Alaina J. James.

ASPIRE - A Journey from Intuition to Innovation
Alhad Mulkalwar.
