INTERNATIONAL JOURNAL *of* MEDICAL STUDENTS

The *International Journal of Medical Students* (IJMS) is a peer-reviewed, open-access journal created to share the scientific production and experiences of medical students and recently graduated physicians worldwide. Our objective is to be the primary diffusion platform for medical students, using standards that follow the process of scientific publication.

The Journal receives contributions and unpublished manuscripts of Original Articles, Short Communications, Reviews, and Case Reports, which are reviewed by experts (Peer-Reviewers) who have previously published similar research. In addition, the Journal accepts Interviews, Experiences, and Letters reviewed by the Editorial Team. This supports the quality and validity of the publications. The time between submission and final publication in most cases has been two to four months depending on the diligence of Peer-Reviewers and Authors.

The *International Journal of Medical Students* is published online triannually on behalf of the Executive Committee of the International Journal of Medical Students. The journal main office is located in the United States of America (USA). Any publication, dissemination or distribution of the information included in the Journal is permitted if the source is cited (*Int J Med Students*).

The *International Journal of Medical Students* is indexed or abstracted in: [Bielefeld Academic Search Engine \(BASE\)](#), [Directory of Open Access Journals \(DOAJ\)](#), [Elektronische Zeitschriftenbibliothek \(EZB\)](#), [Google Scholar](#), [Health InterNetwork \(HINARI\)](#), [Journal Seek Database](#), [List of Publications that follow the International Committee of Medical Journal Editors \(ICMJE\)](#), [Mexican Index of Latin American Biomedical Journals \(IMBIOMED\)](#), [Online Computer Library Center \(OCLC\) WorldCat](#), [Bibliotheca Alexandrina Information for Africa](#), [Pubshub](#), [Research Bible](#), [JournalGuide The e-Journal Gateway \(J Gate\)](#), [The Open Access Digital Library](#), [Publons](#), [Ulrich's International Periodical Directory/Summon by Serial Solutions](#).

The *IJMS* has been highlighted by the [International Healthcare Improvement \(IHI\)](#), [Where to Submit Your Writing: Journals Publishing Student Work](#), and the [American Medical Association \(AMA\)](#), [Where to publish: Top journals for physicians in training, 2015](#).

The journal supports and follows the principles of: [Health Information For All \(HIFA\)](#), [EQUATOR Network](#), [International Committee of Medical Journal Editors \(ICMJE\)](#), World Association of Medical Editors (WAME; *Journal application submitted*), and the Committee on Publication Ethics (COPE; *Journal application submitted*) code of conduct for editors.

The Journal and the Editorial Board are not responsible for the opinions expressed by the Authors of all materials published, nor do these represent the Official Policy or medical opinion of the Journal or the institutions with which they are affiliated unless otherwise stated.

Open Access Policy

This journal provides immediate open access to its content. Our publisher, the University Library System at the University of Pittsburgh, abides by the Budapest Open Access Initiative definition of Open Access to open access to peer-reviewed research literature as "(...) free availability on the public internet, permitting any users to read, download, copy, distribute, print, search, or link to the

full texts of these articles, crawl them for indexing, pass them as data to software, or use them for any other lawful purpose, without financial, legal, or technical barriers other than those inseparable from gaining access to the internet itself. The only constraint on reproduction and distribution, and the only role for copyright in this domain, should be to give authors control over the integrity of their work and the right to be properly acknowledged and cited.”

Furthermore, we encourage authors to post their pre-publication manuscript in institutional repositories or on their websites prior to and during the submission process, and to post the Publisher’s final formatted PDF version after publication. These practices benefit authors with productive exchanges as well as earlier and greater citation of published work.

There are no article processing charges, submissions fees, or any other costs required of authors to submit, review or publish articles in the IJMS.

Peer Review Process

All papers submitted to the International Journal of Medical Students will undergo a two steps peer-reviewers process. The first step of revisions is carried by two anonymous Student Editors who will work together with one Associate Editor. In the second step, the manuscript will be reviewed by two anonymous reviewers (invited reviewers with expertise in the subject matter). Authors will remain anonymous to all the referees.

The typical time taken to conduct the reviews is one to two months. More information can be found at www.ijms.info

Reviewers and editors are obliged to retain the contents as privileged and confidential until publication. The Editor in Chief and the Editorial Board will have final authority over an article's suitability for publication.

Archiving

This journal utilizes the LOCKSS system to create a distributed archiving system among participating libraries and permits those libraries to create permanent archives of the journal for purposes of preservation and restoration.
