ABOUT IJMS

The *International Journal of Medical Students (IJMS)* is an open-access, peer-reviewed scientific journal (ISSN [2076-6327](#)) that publishes original research and experiences in all fields of medicine.

The *IJMS* was created in 2009 to share scientific production and experiences where there is at least one author enrolled as a medical student (including MBBS students, MD students, DO students, MD/MSc students, and MD/PhD students) in any medical school around the world, or a recently graduated physician.

These early-career scientists must be accompanied by a senior researcher that is responsible for the oversight of the research, guaranteeing the quality of the work. As the longest-standing, non-interrupted, international journal for medical students, with the highest impact and visibility in the world, the *IJMS* aims to be the leading diffusion platform for early-career scientists' medical research, using standards that follow the process of scientific publication.

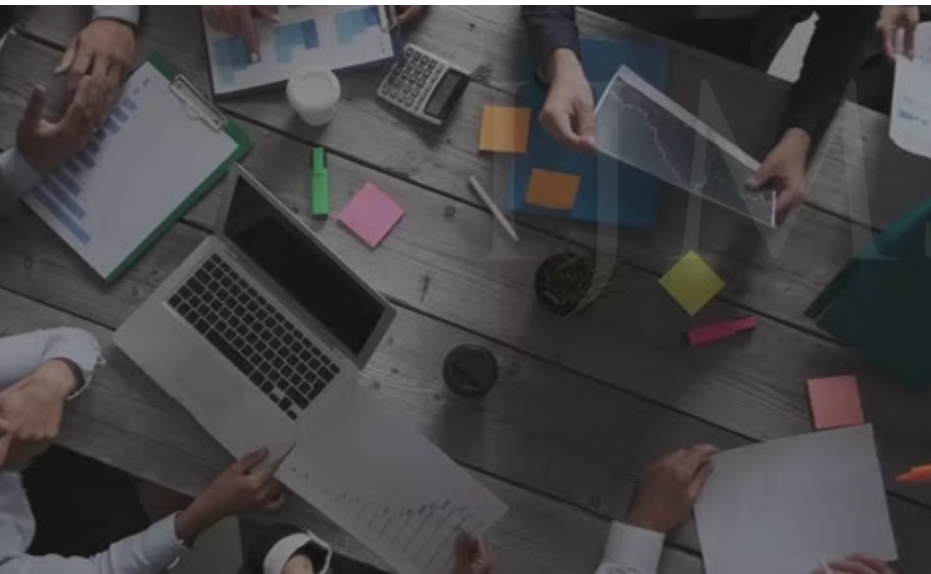

Read more in the [About the Journal section](#).

DATE & LOCATION

November 12, 2022

The first IJMS World Conference of Medical Student Research will be held online on the [YouTube channel of IJMS](#). Please feel free to share our [conference link](#) with your colleagues so that more people interested in these kinds of activities can be reached.

If you have any doubts, please do not hesitate to contact the IJMS Conference Team for clarifications at conference@ijms.info.

WHO CAN PARTICIPATE?

Medical students (including MBBS students, MD students, DO students, MSTP students, MD/MSc students, and MD/Ph.D. students) or recently graduated physicians (<3 years into practice) from all over the world who are interested in sharing their research projects.

OUR VISION

The IJMS World Conference of Medical Student Research presents an excellent opportunity for different cadres of medical students from all over the world to showcase their research.

Equivalently, it **provides a platform for delegates to witness research on new and current topics from all fields in medicine.** Further, this event can create contacts, interest, networking opportunities, joining international projects, and continuing the search for a better and more inclusive scientific society.

Certificates of participation will be provided to all presenters with a special mention of award winners.

HOW TO SUBMIT YOUR ABSTRACT?

Abstracts must be submitted using the **Journal website** and using the **Abstract Template**.

Author instructions -

<https://ijms.info/IJMS/Conference/norms#General>

ABSTRACT SUBMISSION PERIOD:

JULY 1ST, 2022 TO OCTOBER 15TH, 2022

PRESENTATION SUBMISSION FEE

The submission fee for abstracts to participate in the IJMS Conference is \$10 USD. You can pay your fee by clicking on this **PayPal link**.

Keep a record of your transaction number/screenshot and upload it as a supplementary file during your submission at our website **www.ijms.info**.

STEPS

HOW TO SUBMIT YOUR ABSTRACT?

Register and Login in the journal website at www.ijms.info

Click on "**Conference**" and review the information including Rules and Regulations and Abstract submissions.

The screenshot shows the IJMS website interface. At the top, the logo 'IJMS INTERNATIONAL JOURNAL of MEDICAL STUDENTS' is visible. Below the logo is a navigation menu with items: About, Current, Forthcoming, Archives, Submissions, Conference, and Webinars. A search bar is also present. The 'Conference' menu is expanded, showing options: Welcome message, Rules and Regulations, Abstract submissions (highlighted with a red box and an orange arrow), and Sponsors & Partners. On the right side, there is a 'Donate' button with the text 'The IJMS doesn't charge readers or authors, relying on your support'. The main content area on the left is titled 'Abstract submissions' and includes a 'Table of Contents' with links to 'Abstract Requirements', 'Authors Requirements', 'Submission Process', 'Submission Steps to be Completed by the Corresponding Author', and 'Submission fee'. A 'Make a Submission' button is located at the bottom right of the page.

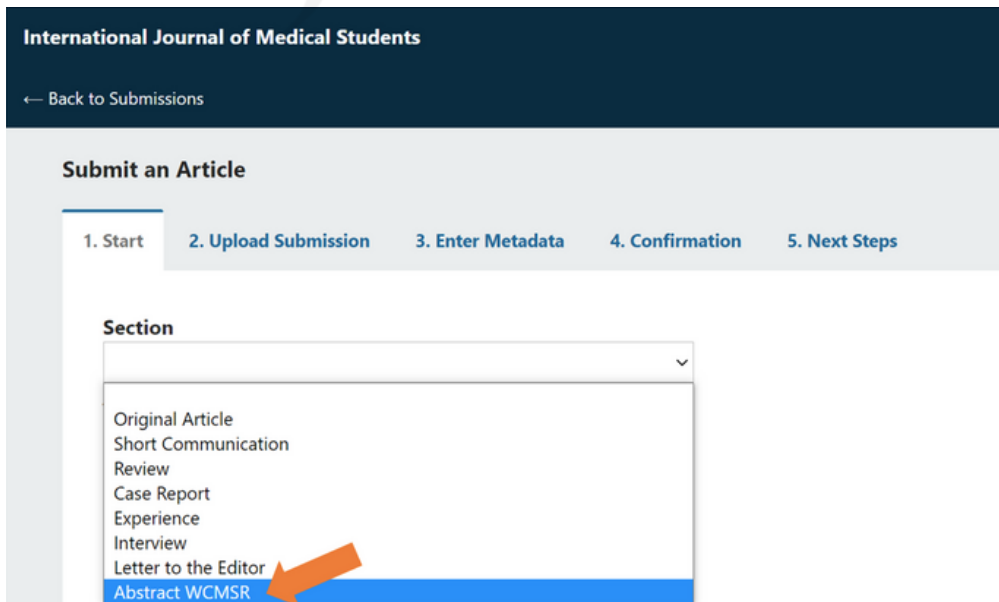

Once you are familiar with the norms and have your abstract ready to be submitted, click on "**Make a Submission**". Here, you can begin a *New submission* or *Continue a pending submission*.

STEPS

HOW TO SUBMIT YOUR ABSTRACT?

Finally, in "Section", select **Abstract WCMSR**. Fill all the required information, upload the supplementary requirement, and follow the prompts.

A member of the IJMS Conference Team will contact you within five working days after assessing your submission for norms adherence and plagiarism.

WCMSR

SELECTED ABSTRACTS

Once the selection process has been concluded, the IJMS Conference Team will send a formal invitation to present the abstract at the first IJMS World Conference of Medical Student Research. The corresponding authors will have up to three days to answer, and to communicate the name of the presenting author.

PAPER PRESENTATION

The presenting authors will be required to share their screen with the slide presentation.

The time allocated for each abstract presentation is **7 minutes in total**. Authors can choose how to use the allocated time, but we suggest the following breakdown:

- ✓ *Who?* Participant's Introduction (30 seconds)
- ✓ *What?* Background and aim (1 minute and 30 seconds)
- ✓ *How?* Methods of your research (2 minutes)
- ✓ *Why?* Practical application of the results (2 minutes)
- ✓ *Thanks!* Conclusions of the study (1 minutes)

Audience - may view the conference from YouTube live link.

MEDICAL EDUCATION RESEARCH WEBINARS

Through the platform of the journal, we strive to promote the environment of learning and scientific development. IJMS Medical Education Research Webinars serve to develop the culture of virtual mentorship for medical students unable to attend such programs in their home countries. These Webinars are scheduled to be held every month.

You may register for the first webinar on Introduction to Research and Publication by Dr. Abdelrahman I. Abushouk at <https://www.youtube.com/watch?v=79BuaEhnXxM>. Please visit the IJMS website - <https://ijms.info/IJMS/webinars> to get more information regarding this.

PARTING MESSAGE

We strongly believe that this new conference will further promote the integration of medical students and young physicians in the medical research field. We also hope that this event can help create contacts, interest, and motivation in coming together, joining international projects, and continuing the search for a better and more inclusive scientific society.

The Otto Research Initiative

The Otto Research Initiative is founded by two international medical graduates, with the aim to disseminate research methodology for free. As IMGs, we understand the hardships that most of us face in this journey towards residency. Having seen these nuances occurring repeatedly, we have taken up the mantle ourselves to help out our fellow IMGs to get a head start on being published authors.

International Society for Chronic Illnesses

The International Society for Chronic Illnesses is an effort to unite health care workers from all over the world to improve the quality of life of people with chronic conditions.

Our Mission is to alleviate the morbidity associated with chronic illnesses through observation, analysis, implementation, and follow-up.

Association of Future African Neurosurgeons

The Association of Future African Neurosurgeons (AFAN) is an international non-governmental and non-profit organization, consisting of students, early-career physicians, neurosurgical residents, neurosurgeons, neuro-anesthetists, neurologists, neuroanatomists, and neuro-pathologists from all over the world mainly from Africa. AFAN is an interest group that provides mentorship, education, advocacy, and research in neurosurgery and related fields.

The Researchist

The Researchist is a scientific research community for early career researchers, which organizes workshops and training in research methodology and provides research opportunities for students in health sciences, engineering, and natural sciences. The Researchist contains students from several Arab countries such as Syria, Jordan, and Egypt. Currently, we are carrying out online and offline workshops and we aspire to enter the research world in fields of humanities and social sciences.

Squad Medicine and Research

Squad Medicine and Research (SMR) - OF the Students, BY the Students, FOR the Students is a totally freely functional multidisciplinary voluntary group. We aim to strengthen healthcare through a particular emphasis on medical research. We believe that strengthening healthcare is a multidisciplinary approach that requires working on a number of aspects. Currently, we have 1000+ members in our groups.
